The Gambia National Referral Hospital and AIDS: increasing HIV seroprevalence and condom use.

To establish levels and determinants of HIV prevalence among adults attending the National Referral Hospital in 1989 and to examine trends over the following 3 years. A random sample of 500 patients attending the HIV clinic of the National Referral Hospital was selected for the survey of indicators of HIV prevalence. In addition, the number of patients attending the clinic per week was monitored on a regular basis over a 12-month period of time. Patient charts and Medical Records Departments of the hospital were utilized to collate clinical

data on all patients who were seen in the clinic in 1989, 1990 and 1991. The HIV prevalence was 13.2% and remained relatively constant over the three years. Although AIDS was uncommon, the findings suggest that the risk of HIV infection at the hospital as a whole was not declining in the immediate future. The finding of low levels of condom use in the community is discussed with particular reference to the hospital setting and the need for correct information and education.

M.D.W. Pimps-Out at Public Board Meeting

PHILADELPHIA -- The top man of the Lower Merion School Board declared himself "shocked and outraged" today by allegations that his board is running a prostitution ring out of a school district office. The comments from Dr. William W. Osborne, who serves as vice chairman, came after a raucous, hour-long board
